

ENTERPRISE REPUBLICANS

Founding Principles

Diversity

We strive to create a diverse and inclusive Republican Party focused on individual freedom. Furthermore, we proudly promote policy that protects the human rights of all Hoosiers, regardless of race, color, sex, disability, sexual orientation and gender identity.

Economy

We believe in creating policy that promotes a climate suited for economic growth and success for all businesses and individuals. To that end, we champion free market, incentive based solutions to solve our nation's problems.

Immigration

America is a nation of immigrants. We promote common sense immigration reform that efficiently secures our borders and ensures the safety of our citizens. At the same time, we recognize that all immigrants, regardless of legal status, are human beings, and strive to create policy that protects their dignity. We acknowledge that the migrant workforce is instrumental to the success of many sectors of our economy, and without comprehensive immigration reform, those sectors will struggle to reach their full potential.

Fiscal Responsibility

As Republicans, it is essential that we create a fiscally responsible government, fighting to put an end to reckless spending and inefficient government.

Individual Freedom

Individual freedom is at the core of our beliefs. We believe that government is obligated to protect the liberty and safety of its citizens without intruding or interfering in their lives.
